

About the Company

The web app prioritizes patient needs, streamlining care coordination and communication for Acute Catastrophic and Complex Workers' Compensation Cases. It leverages technology to enhance efficiency and promote optimal outcomes through automation and personalized interventions. Overall, it offers a comprehensive solution for managing complex cases effectively.

The Problem Statement

Managing Acute Catastrophic and Complex Workers' Compensation Cases is fraught with challenges, including fragmented communication among stakeholders, lack of personalized interventions, and inefficient care coordination.

The Challenge

Addressing the unique needs of patients involved in such cases requires overcoming barriers to effective communication, streamlining care coordination processes, and implementing personalized interventions tailored to individual circumstances. Finding a solution that integrates technology to enhance efficiency while prioritizing patient-centered care is essential.

The Solution

Spiralogics offers a web-based platform designed to revolutionize the management of Acute Catastrophic and Complex Workers' Compensation Cases. The solution prioritizes patient needs by facilitating seamless communication among stakeholders, streamlining care coordination, and implementing personalized interventions through innovative technology. By leveraging automation, data analytics, and tailored approaches, Spiralogics' solution aims to improve outcomes, reduce costs, and enhance overall satisfaction in managing complex workers' compensation cases.

Tech Stack

P2R utilizes a tech stack comprising .NET Core, KnockoutJS, C#, SQL Server 2017, and Serilog for efficient and robust application development and logging.
