IMPAXX | 111 REPORTER

About the Company

This is a system designed for Medicare and Medicaid reporting, meeting CMS Section 111 requirements. It efficiently handles online claim submissions, interprets CMS response files, tracks claim statuses, ensures error-free submissions, and generates comprehensive reports.

The Problem Statement

Healthcare organizations face challenges in complying with the reporting requirements outlined by the Center for Medicare and Medicaid Services (CMS) Section 111 Reporting. Managing online claims submissions and interpreting CMS response files efficiently and accurately can be error prone. Existing systems lacked comprehensive functionalities, leading to issues with claim tracking, submission errors, and compliance risks.

The Challenge

Developing a solution that addresses the complexities of CMS Section 111 Reporting while providing integration with existing systems poses several challenges. Key challenges include ensuring the system covers all necessary functions for efficient reporting, supports multiple file formats for claim submission, maintains proper records and statuses of claims, and prevents errors in submissions to CMS. Additionally, the solution must be user-friendly, scalable, and adaptable to evolving CMS requirements.

The Solution

Spiralogics offers a solution in the form of IMPAXX MIR (Medicare and Medicaid Interchange Reporting), tailored to address the specific needs of healthcare organizations grappling with CMS Section 111 Reporting.

Key Features of the Solution:

- Comprehensive Functionality: IMPAXX MIR is specifically designed to cover all necessary functions required for efficient and effective reporting of online claims and interpretation of CMS response files.
- Flexibility in Claim Submission: The system supports various file formats (.csv, .txt, .xml) for claim submission, providing ease of use for healthcare organizations.
- Robust Claim Management: IMPAXX MIR maintains proper records and statuses of claims throughout the reporting process, enabling healthcare organizations to track claims accurately.
- Error Prevention Mechanisms: The solution incorporates error-checking mechanisms to ensure error-free submission of claims to CMS, minimizing compliance risks and submission errors.
- Customizable Reporting: IMPAXX MIR generates customizable claim reports, allowing healthcare organizations to monitor claim statuses and performance effectively.

Tech Stack

The tech stack comprises .NET and Microsoft SQL Server (MSSQL) for application development and database management.
